

1-TO-1 AI COACHING FOR LEGAL LEADERS

Your standards. Your risk.

A practical *AI plan*.

A private leadership lesson on what AI means for legal and risk-aware services: useful speed, verification risk, confidentiality, and how to lead AI use without weakening professional standards.

SECTOR ISSUES

- **Clients want efficiency** - but they still expect professional standards, not cheaper risk.
- **AI errors look polished** - fake citations, weak reasoning and stale sources can pass too easily.
- **Knowledge is fragmented** - templates, precedents and judgement often live in people's heads.

IN YOUR 1-TO-1 LESSON

- **Map safe use cases** - prep notes, first drafts, summaries and research checks.
- **Practise verification habits** - what can be pasted, what must be checked and what stays off tools.
- **Leave with a firm AI position** - plain-English rules staff can actually remember and use.

This is coaching, not a tool demo. The lesson connects AI use to your duty of care, client trust and firm practice, then turns that into a practical action plan.

A coached route from risk to practice

The useful question is not whether AI can produce words. The lesson coaches you through whether the work is verified, confidential and fit for the professional standard clients expect.

Taught and advised leaders at **Google, Microsoft, SAP, Adobe** and **Vodafone**. Writing on AI in **Fast Company** and **The Guardian**.
