

1-TO-1 AI COACHING FOR RECRUITMENT LEADERS

Your desk. Your market. A practical *AI plan*.

A private leadership lesson on what AI means for recruitment now: more applications, less signal, faster client expectations, and how you use AI without damaging trust.

SECTOR ISSUES

- **AI-written applications** - more volume, less signal and harder judgement from CVs alone.
- **Speed pressure from clients** - shortlists, salary insight and follow-ups are expected faster.
- **Trust and transparency** - candidates accept useful AI, but resist hidden or unfair automation.

IN YOUR 1-TO-1 LESSON

- **Map your best desk uses** - briefs, outreach, interview prep, adverts and client updates.
- **Practise better judgement** - stronger signals, sharper questions and clearer human review points.
- **Leave with a leadership stance** - what consultants can use, disclose and rely on.

This is coaching, not a tool demo. The lesson starts with your desk, markets and consultants. You leave with practical workflows and a clear AI vision for faster work that still feels human.

A coached route from pressure to practice

AI can remove a lot of admin friction, but recruitment still runs on confidence, timing and judgement. The lesson coaches you through how to use AI for the paperwork while keeping people at the centre of the placement.

Taught and advised leaders at **Google, Microsoft, SAP, Adobe** and **Vodafone**. Writing on AI in **Fast Company** and **The Guardian**.
