

FOR CORPORATE FINANCE & PROFESSIONAL SERVICES

Synthesis and preparation, with trust *preserved.*

For partners and directors: use AI for synthesis, preparation and diligence support — with the discretion and accuracy your clients rely on.

Designed for leaders. Beyond day-to-day skills, you'll build the understanding to see what AI means for your role, your people and your business model — and develop your own AI vision and action plan for the firm.

WHERE IT HELPS, DAY TO DAY

- **Synthesis** — distil long documents, data rooms and reports down to what matters.
- **Preparation** — get meeting- and deal-ready faster, with sharper questions in hand.
- **Diligence support** — speed up first-pass review and flag what a human should check.
- **Knowledge-sharing** — capture hard-won deal experience the whole team can draw on.

Built to preserve trust

In this work, accuracy and confidentiality are not negotiable. Lessons cover what to use AI for, what to keep firmly off it, and how to verify — so you get the speed without putting client trust, or your professional standing, at risk.

Taught and advised leaders at **Google, Microsoft, SAP, Adobe** and **Vodafone**. Writing on AI in **Fast Company** and **The Guardian**.
