

FOR RECRUITMENT LEADERS

Faster prep and research. The *relationships* stay yours.

For agency owners and team leads: use AI to sharpen conversations, speed up research, and give the whole desk the confidence to use it well — without losing the human touch that wins business.

Designed for leaders. Beyond day-to-day skills, you'll build the understanding to see what AI means for your role, your people and your business model — and develop your own AI vision and action plan for the business.

WHERE IT HELPS, DAY TO DAY

- **Candidate & client conversations** — better prep, sharper briefs, faster follow-ups.
- **Salary-guide & market research** — pull together rates and trends in minutes.
- **Day-to-day productivity** — adverts, summaries, outreach and admin, all faster.
- **Staff confidence** — get the whole desk using AI well, not just the early adopters.

Faster work, same relationships

Recruitment runs on trust and timing. AI handles the prep and the paperwork so your consultants spend more time on the calls, the meetings and the relationships that actually place people — and feel confident, not threatened, using it.

Taught and advised leaders at **Google, Microsoft, SAP, Adobe** and **Vodafone**. Writing on AI in **Fast Company** and **The Guardian**.
